Description:

Height x Width: 1.5 x 2 m

Habit: Compact and rounded.

Stems & leaves: Young stems upright-arching bright red. Leaves large neatly arranged on the stems with red petioles.

Panicles: Medium sized (200 x 200cm) rounded panicles semi-open with very few fertile flowers and around 60% cover of colour changing sterile flowers. They start out white, before turning pink and then turning to a deep dusky brick red.

Overall assessment: An excellent compact cultivar with interesting colour changing of the panicles.

Origins: Bred by W A Ruten in 2001 as part of an ongoing breeding program in Leende, in the Netherlands, with the goal of developing a new cultivar of panicule hydrangea with strong stems and inflorescences that change in colour from white to red. It originated from a cross made between 'Pink Diamond' as the female parent and 'Dharuma' as the male parent.
