

Hydrangea paniculata 'Diamantino' ^{PBR} Acc 1292

Synonyms: 'Ren 101'.

Awards: No awards found.

Patents: PLP 14121327, Start: 2016-07-26

PBR: 20131367, Start: 2016-04-25

Description:

Height x Width: 1.5 x 1.5 m

Habit: Spreading habit.

Stems & leaves: With thin arching brown stems that are too thin to hold up the flowers on young plants. Leaves medium sized and unattractive.

Panicles: With large dense panicles 300 x 200mm. The small sterile flowers are packed in tight clusters and the sterile flowers cover 100% of panicle. They start off yellow-green become white but age to green and then pink, ending a dull brick red. However, the different colouration of the sepals in the same panicle can give a strange multicolored appearance.

Overall assessment: An unusual cultivar and quite impressive, when pruned to form a strong supportive structure for the large panicles.

Origins: This cultivar resulted from a controlled breeding program that commenced in 1987 by Jean Renault in his nursery in Gorrion, France, and selected as a whole plant mutation of 'Diamant Rouge' in 2007.
